Overview **2**
Ticket Simply Application API 2
1. Coach Type API **3**
2. Coach API **6**
3. Branch Details API **9**
4. User Details API **11**
5. Stage Details API **15**
6. Agent Details API **18**
7. Route Details API **22**
8 .Booking Callback Response Changes **28**
1. Bookings Callback 29
2. Release Ticket Callback 30
3. Service Callback 31
4. Boarding Details Callback 34
5. Shift Ticket Callback 35
6. Update Ticket Callback 36

Overview

Ticket Simply Application API.Below API is used to get the details from the Bitla Operator. ‘GET’ api can be called once per day. Authentication for all the API’s x-token is mandatory to pass in Header.

To Generate X-TOKEN
date = '2020/08/26' #current date format 'yyyy/mm/dd'
api_key = "pass_user_api_key_here" #get this api_key from the login API.
data = "#{travel_subdomain}|#{api_key}|#{date}"
xtoken = encryption(data) #Using SHA256 algorithm to encrypt the data

1. Coach Type API

```
//To get the particular coach type detail
```

Request URL: **GET** `internal/api/coach_type/:coach_id.json?`
`EG: internal/api/coach_type/2.json?`
Header: `X-TOKEN = "QWERTY"`

Request Params:

Parameter	is_mandatory	Type	Example	Description
coach_id	mandatory	integer	7	Coach id

Response Body:

Response key	is_mandatory	Type	Response Value	Remarks
id	mandatory	integer	7	Coach id
coach_type	**mandatory**	**string**	**Non A/c Sleeper, Seater, Semi Sleeper**	**Type of coach(Seater/Sleeper etc)**
total_seats	mandatory	integer	30	Total Seat Count
status	mandatory	string	Active, Inactive, Proposed, Delete	Whether coach is Active or not

is_ac	mandatory	boolean	AC, Non AC	Coach is Air conditioned or not
is_video	mandatory	string	LED, LCD, Cabin LED, Non Video	Type of video in coach
bus_type	mandatory	string	seater	Type of seat bus
c_type	mandatory	string	Regular, Pickup	Regular or Pickup van
created_at	mandatory	string	17/08/2018 11:13:36	Date and time of coach creation
updated_at	mandatory	string	20/08/2018 18:26:27	Date and time of coach updation

Response Body:

```
{
  result:[
  [
  "id",
  "coach_type",
  "total_seats",
  "status",
  "is_ac",
  "is_video",
  "bus_type",

7. Route Details API

//To get the particular active route details

Request URL: **GET** `internal/api/route_details/:route_id.json?`

EG: `internal/api/route_details/4.json?`

Header: `X-TOKEN = "QWERTY"`

Request Params:

Parameter	is_mandatory	Type	Example	Description
x-token	mandatory	string	QWERTY	Authentication
agent id	mandatory	integer	12	Id of the agent in Database

Response Body:

Response key	is_mandatory	Type	Sample Response Value	Description

id	mandatory	integer	4	Id of routes
route_created_date	mandatory	string	Mon, 04 Mar 2019	Date when route is created
route_name	mandatory	string	string	Name of route
weekly_schedule	mandatory	integer	1,1,1,1,1,1,1	Wether service is weekly or daily
service_number	mandatory	string	BNG_CHN_Package	Service number
coach_type	mandatory	string	Non A/C Seater 40	Type of coach
origin	mandatory	string	Bangalore	Starting city of route
destination	mandatory	string	Chennai	End city of route
service_start_date	mandatory	string	Mon, 04 Mar 2019	Start date of service
service_arrival_time	mandatory	string	14:30	Arrival time of service
service_departure_time	mandatory	string	15:00	Departure time of service
advance_booking	mandatory	integer	30	Days before booking opens from travel date
is_multihop	mandatory	boolean	yes	Wether service is multihop or not
multistation	mandatory	string	"{"Origin(18)-Destination(21)" => [["(Departure time)14:30", "(Travel Duration)33:00", 0, 0], {"(Weekday)0"=> {"(Adult Fare)2"=>{"1"=>	Multistation fares and timings.

			"2000", (Comission)"2"=>"200"}, "3"=>{"1"=>"2000", "2"=>"200"}, "12"=>{"1"=>"2000", "2"=>"200"}, "13"=>{"1"=>"2000", "2"=>"200"}}},”	
city_seq_order	mandatory	string	"18,29,24,25,1"	Sequence of cities from origin to destination
created_on	mandatory	string	17/08/2018 11:13:36	Date and time of route creation
updated_on	mandatory	string	20/08/2018 18:26:27	Date and time of route updation

Response Body:

```
